KANAV SHARMA

GENAI / LLM ENGINEER • DATA SCIENTIST

9469850599 | kanav608@gmail.com | LinkedIn | GitHub | Blog

PROFILE

Data Scientist with more than 7 years of experience developing machine learning, deep learning, forecasting, NLP, and Generative AI solutions across FMCG, banking, credit analytics, and power sectors. Built production-grade Agentic AI, Agentic RAG, GraphRAG, and multi-agent systems on Databricks, fine-tuned LLMs using LoRA, QLoRA, PEFT, RAFT, and DPO, and evaluated model quality using RAGAS and LLM Eval frameworks. Partnered closely with cross-functional stakeholders throughout delivery, translating technical work into measurable business impact through AI-driven automation and predictive analytics.

SKILLS

GenAI / LLM: RAG & GraphRAG, Agentic AI, Agentic RAG, LangChain, LangGraph, Multi-Agent Systems, LoRA/QLoRA, PEFT, RAFT, DPO, RLHF, Prompt Engineering, MCP, RAGAS, LLM Eval

Vector & Graph Stores: Pinecone, ChromaDB, FAISS, Neo4j

ML / DL: Python, R, SQL, PyTorch, Scikit-learn, XGBoost, Time Series Forecasting, Time Series Foundation Models (Chronos, TimesFM, Lag-Llama, TimeGPT)

Cloud & Tools: AWS (EC2, SageMaker, S3), Databricks, Docker, GitLab, Tableau, Selenium

WORK EXPERIENCE

Data Scientist — Tiger Analytics **(Client: PepsiCo)** *Aug 2024 – Present*

- **Trade Promotion Copilot (RAG):** Built a production retrieval pipeline (LangChain, Pinecone, sentence-transformers) with pricing/ROI/compliance multi-agents for promotion analytics — **15%** ROI improvement, cut planning cycle from 2 weeks to 2 hours.
- **Supply Chain Early Warning (Agentic AI):** Multi-agent system (LangGraph) for monitoring, risk scoring & mitigation with real-time web/API ingestion and a Neo4j supplier graph — predicted disruptions 10+ days ahead, **40%** stockout reduction.
- **Fine-tuned LLM for Contract Extraction (LoRA/QLoRA):** Fine-tuned Mistral-7B for structured extraction from FMCG contracts/invoices — **92% F1**, reduced processing time from 6 hours to 15 minutes.
- **GraphRAG — Distributor Network Intelligence:** Built a Neo4j knowledge graph (distributors → retailers → products → schemes) with GraphRAG + Cypher for multi-hop queries — **90%** faster query resolution, surfaced 15% underperforming distributors.
- **Automated P&L Forecasting System:** Built an automated, full P&L AI-driven forecasting system for PepsiCo's FP&A team, achieving **97–99%** offset accuracy — transitioned the business from manual to AI-driven planning.
- **Time Series Foundation Models (R&D):** Evaluated state-of-the-art time series foundation models (Amazon Chronos, Google TimesFM, Lag-Llama, Nixtla TimeGPT) for forecasting performance; **deployed Lag-Llama to production**.
- **Platform & Stakeholder Management:** Executed and deployed all GenAI/ML projects on **Databricks**, maintaining constant engagement with and management of business, engineering, and leadership **stakeholders** to align priorities and drive adoption.

Senior Data Scientist — TransUnion (APAC Region) *Mar 2023 – Aug 2024*

- Built decision-tree models for reject inferencing; boosted a banking model's accuracy from **73% to 85%** with XGBoost and improved Vintage Delinquency/Roll Rate analysis accuracy by **20%** via trade reconstruction logic.
- SME for Philippines market trends; developed **3** industry-adopted products for pre-sales showcased at national big data summits, and automated the solution-consulting workflow, cutting team workload by **20%**.

Junior Associate — Kreate Technologies *Feb 2020 – Mar 2023*

- Delivered **15+** ML models (regression, classification, time series) for the power sector; grew business **300% in 2 years** and cut forecast MAPE by up to **40%** via ensembling and CV-based pixel extraction; deployed on **AWS** (EC2, SageMaker).

Software Developer — RoboMQ Pvt Ltd *Jan 2019 – Aug 2019*

- Built a Decision Tree (ID3) classification model to predict favorable conditions for tennis match outcomes, achieving **84%** accuracy.
- Built a Logistic Regression model to assess the likelihood of users navigating to key website links (Contact Us), achieving **86%** accuracy.

PERSONAL PROJECT

Digital Historian — Agentic GraphRAG System github.com/mekanavsharma/the-digital-historian

- Built an agentic GraphRAG system (Neo4j, LangGraph) with OCR-based PDF data extraction, MoE-routed PEFT (LoRA/QLoRA) fine-tuning via RAFT, aligned with RLHF (DPO), exposed as tools through a custom MCP server for multi-agent orchestration, and a Gradio UI.

EDUCATION

B.Tech, Computer Science Engineering — Suresh Gyan Vihar University, Jaipur 2015 – 2019 | 7.9 CGPA

ACHIEVEMENTS

2x Quarterly Best Performance Award winner — TransUnion
